EDUCATION

I am currently pursuing a Bachelor of Science in Software Engineering at Addis Ababa University, with an expected graduation date of June 2027. Throughout my academic journey, I have completed courses such as Data Structures and Algorithms, Web Development, Database Systems, Discrete Maths, and Fundamentals of Networking, which have provided me with a solid foundation in programming and problem-solving.Through my three years of learning I was able to work on two main projects and those are on "Prison mangment system " and "Inventory managment system". As for certificate I recieved a cisco course completion certificate in Networking course.

HOBBIES

Gym

The gym is one of my favorite places to enhance both my physical and mental well-being. I enjoy working out regularly to stay fit and challenge myself with new fitness goals. Whether it's lifting weights, cardio workouts, or participating in group fitness classes, the gym offers a variety of options for improving strength, endurance, and overall health. Besides physical fitness, I also value the mental clarity and stress relief that comes from a good workout session.

Martial Arts

Martial arts has been a passion of mine for years. It not only provides an excellent workout but also helps in developing discipline, focus, and respect. Martial art brings its own unique set of techniques and philosophies. Training in martial arts also teaches self-defense skills and provides a sense of community and camaraderie with fellow practitioners.

Chess

Chess is more than just a game for me; it's a way to exercise my mind and develop strategic thinking. I enjoy the challenge of analyzing each move, predicting my opponent's strategy, and adapting to new tactics. Chess improves critical thinking, patience, and decision-making skills. Whether playing casually with friends or in tournaments, I love the mental stimulation and satisfaction that comes from a well-played game of chess.

PAST LIFE EXPERAINCE

EXPERIANCES

his section is about an unforgettable experience that holds deep meaning in my life. It's a moment that shaped my perspective, taught me valuable lessons, and revealed more about who I am. Reflecting on this experience helps me understand myself better and continues to influence the way I approach life's challenges and opportunities.

Graduation

This was experaince back in the day in our graduation time where we just gradated before taking the Matric exam and it was the time where every teacher showed as ho much they believe in us which made more confident and finish in outstanding performance being on of the seven schools that graduate all their students. And this has taken place in my mind since then.

Cosplay

This section is about my unforgettable experience cosplaying as one of the great heroes from my country's history. Bringing their story to life through detailed costume design and performance taught me a deeper appreciation for their bravery and sacrifices. It was a way to honor their legacy and inspire others to learn about our rich history. Sharing this journey with others at events made me feel connected to my culture and proud of the values they stood for. It was more than cosplay—it was a tribute to our past and a reminder of the strength that shapes our future.

TRAVEL STORIES

SEMIEN MOUNTAINS

Visiting the Semien Mountains was an experience that challenged me and helped me grow. The tough hikes taught me to keep going even when things got hard, and the beautiful views and wildlife sparked my curiosity and creativity. Camping under the stars and climbing Ras Dashen showed me the value of staying focused and pushing through challenges. This trip matched my love for adventure and reminded me that I can handle new challenges with a positive attitude.

MEDANIEALEM GEDAM

Visiting this spirtual place was a special and peaceful experience. Walking through the ancient rock-hewn churches, I felt connected to history and faith. The sound of priests chanting and the quiet, sacred atmosphere left a deep impression on me. Watching pilgrims pray with such devotion made me think about the power of belief and the beauty of spirituality. This trip helped me appreciate Ethiopian heritage and gave me a chance to reflect and feel grateful

MY IDOLS

h world, have a unique way of inspiring and shaping the paths of those who look up to them. For me, tech idols like visionaries, innovators, and problem-solvers have played a big role in motivating my journey. Their ability to think creatively, overcome challenges, and create solutions that change the world has deeply influenced me. Watching how they embrace learning and persevere through obstacles has taught me the value of determination, curiosity, and adaptability in technology. Their stories remind me that big ideas often start small and that passion and dedication can lead to remarkable breakthroughs. Some of mine are below

VIDEOS

SPEECHES

A motivational speech that truly impacted me emphasized the power of consistency. The speaker explained that success isn't about making one big leap, but about making small, steady efforts every day. They highlighted how even the most successful people achieved greatness by being consistent in their work, even when results weren't immediately visible. This message resonated with me because it reminded me that long-term success is built through persistence, dedication, and showing up day after day, no matter how tough it gets. It encouraged me to stay focused and trust that my consistent efforts will lead to growth and progress.

FUTURE CAREERS AND PLANS

As a future software engineer, I aspire to contribute to innovative technological solutions that address real-world challenges and improve people's lives. I envision myself excelling in designing and developing efficient, scalable, and user-friendly software systems. My goal is to work on cutting-edge projects that integrate emerging technologies like artificial intelligence, cloud computing, and blockchain to revolutionize industries. With a commitment to lifelong learning, I aim to continuously enhance my technical expertise, adapt to evolving trends, and play a key role in fostering technological advancements. Beyond technical skills, I also seek to lead and inspire teams, promoting collaboration and creativity to drive impactful projects and deliver meaningful results. And to accomplish this I plan to follow this road map to the fullest.
